- ✓ Taxis
- ✓ Transport for London
- ✓ Congestion Charging Helpline

Great Ormond Street Hospital (GOSH) is using an Infopoint help-point to enhance facilities in its brand new, state-of-the-art main entrance.

As one of the UK's busiest specialist hospitals, Great Ormond Street Hospital, is using an Infopoint help-point to enhance the facilities it offers to patients, staff and visitors.

The hospital doesn't have a public car park, so access to taxis, public transport information and congestion charging information for occasional drivers into the capital are crucial to the swift and smooth flow of people.
