The industry-leading taxi free phone and help point solution

Reliable performance

Our units are extremely robust, with a tough metal casing, armoured handset cable, magnetic hookswitch and the same rugged electronic components found in roadside emergency phones. A GSM option is available on all units for sites with limited telephone line capacity.

Complete service

Our complete service includes telephone line installation, cabling (we use your nominated cabling contractor), installation of the Infopoint units, made-to-measure backboards and signage, as well as ongoing monitoring and maintenance of all equipment.

Standard features on all Infopoint units:

- ▶ Hearing aid-compatible audio induction loop
- ▶ Large, easy-to-use push buttons
- ▶ Vandal-resistant enclosure and electronics
- ▶ GSM option – no telephone line required
- ▶ Remote fault monitoring
- ▶ Fully customisable with your branding
- ▶ Bespoke signage and backboards included
